

Ref: 27/11

Date: 13.03.2011

Dear Shri Nerurkar,

I have been given impression that 'a carrying capacity based Environment at Impact Assessment (EIA) study with regard to the city of Jamshedpur was done by the National Environment Engineering Research Institute (NEERI) at the instance of the then Tata Iron & Steel Co. (TISCO) between 1992-94. This study was followed by an Environment Management Plan consistent with the enhancement of steel production capacity at Jamshedpur and related development planning in and a round the city.

I shall be grateful if you please take trouble to make me available a copy of the said study and the plan. It may help me understand the present state of affair of the environmental degradation and plan a study regarding the current scenario of water, air and land pollution the city of Jamshedpur.

With Regards,

Yours,

(Saryu Roy)

To,
Shri H.R. Nerurkar
MD., Tata Steel
Jamshedpur
